[The WaterWatch Spring 2018 Newsletter - Featuring Us!](#)

Without WaterWatch, many of Oregon's rivers and streams would run dry:

WaterWatch.org

In 2015, we successfully removed the last two dams on Evans Creek (a tributary of the Rogue River).

Wimer Dam Removal Video

Oregon Department of Fish & Wildlife has subsequently confirmed that we now have Chinook Salmon, Coho Salmon, Cutthroat Trout and Steelhead in Evans Creek (a tributary of the Rogue River) and in Spignet Creek (a tributary of Evans Creek) which both flow through our property which is about 25 miles upstream from the Rogue River.

We are nearly always engaged with some conservation effort. Here is our most current joint project of removing three small dams and relocating **the land owner's associated** water right Point of Diversion:

2021 Rogue River / Applegate River / Slate Creek Project
